Sticky knowledge!

Cave paintings:

Instead of using a pencil to draw an outline of your picture, use a finger and dip it in some paint- this will give you a more authentic style.

Background wash:

To create a coloured background before you sketch, try using water colours. Ensure you use a larger brush and cover the entire page. Leave to dry completely before drawing on it to avoid ripping.

Asking questions:

- Why did Neanderthals create cave paintings?
- What did their pictures show?
- What would they have used to make the paint?
