17th February 2022

Dear Parent/Guardian

RE: Year 6 Adaptation Workshop on the 18th March 2022

We have an exciting opportunity to work with Animal Teach to support and enrich our Science topic of Evolution and Inheritance.

During this workshop, the children will get to meet lots of different species of animals including insects, reptiles and lizards. They will learn about the different characteristics of the animals and how they have evolved and adapted to suit their environment. We will look at their habitat and how their special characteristics enable them to survive.

We will use this information to support our non-chronological report writing in English.

In order for the children to take part in the workshop, we are asking for a contribution of **£5.00** to cover the cost which can be paid via **SCOPAY** online. This includes all of the resources that the children will be provided with and use during the session.

Thank you for your continued support.

Yours sincerely

Mrs Ireland,
Year 6 Class Teacher
