

Reducing Waste

Dear Parents / Carers

We are asking for your help in reducing food waste and the use of single-use plastic being used for packed lunches.

Given the current climate and in view of recent observations, it is sad to see a significant number of children wasting their food. Children are putting half-eaten sandwiches, bags of crisps, yogurts, fruit etc. in the bin.

We all need to be proactive about this. So, after some discussion, from 4th January 2021, children will NOT be able to put any waste from their packed lunches in the bin. This will not only let you know what your child/ren have or haven't eaten, but will also stop food going to waste.

In addition, to help the environment, we would also like to discourage single use plastics in packed lunches. We hope you understand our mission to help the environment and thank you, once again for your continued support.

Yours faithfully
